EDUCATION

Kings College London,

Bachelor of Sciences in Computer Science, First Class Honours

September 2020 – May 2023

Rooks Heath College,

A Levels - AAB (Mathematics, Computer Science, Sociology)

September 2013 – June 2020

WORK EXPERIENCE

Software Developer

PulseLive (<https://www.pulselive.com/>)

September 2023 – Present

- Contributed across **front-end (React/Preact)**, **back-end (Java/Spring)**, and **mobile (Android)** to deliver scalable features for global sports platforms including **Premier League, Saudi Pro League, England and Wales Cricket Board and Barcelona FC**.
- Led a business proposal on **AI integration**, exploring how Pulselive could incorporate **generative AI** into its offerings for clients. Outlined **use cases**, tooling recommendations, and practical pilot opportunities tailored to sports media and fan engagement.
- Led **Maestro testing** rollout for SPL and Premier League mobile apps. Coordinated across QA and Developers, **standardised naming/tagging conventions**, and **centralised test documentation**.
- Upgraded core services to **Java 21**. Handled **CI/CD deployments using ArgoCD** and managed staging, dev, and prod environments.
- Proposed and implemented improvements in team workflow: introduced **QA signoff to Maestro PRs**, improved Premier Leagues tagging process, and drove testing alignment via shared Confluence documentation and meetings.
- Bridged communication between QA and Developers, led Maestro planning meetings, relayed feedback to squad leads, and presented solutions to blockers.
- Recognised for proactive attitude, debugging skills, and ability to work independently across multiple codebases and disciplines (FE, BE, Mobile).

Technology Intern

Bright Network (<https://www.brightnetwork.co.uk/>)

July 2021 – August 2021

- Gained hands-on experience with cloud computing (AWS), React for UI development, and explored various software testing methodologies.
- Initiated a technology consulting project, producing a comprehensive proposal to address key business objectives, utilizing Java and TDD practices.

Programming Instructor

Learning Leap Education

March 2017 – March 2020

- Designed and delivered a web development curriculum for young adults, fostering a passion for programming and technology among students.

PROJECTS

Personal Website: <https://zanemehdi.com/> (for additional information and projects)

Game Logger

A modern, full-stack web application for tracking your gaming journey. Built with React, Node.js, Express, and Supabase, Game Logger helps you organize your game library, discover new titles, and get AI-powered recommendations.

Pacman AI

Created an AI agent using machine learning techniques to play Pacman and aim for high scores. This project demonstrated reinforcement learning concepts using Python.

Bicycle Hire App

Created a mobile app with Flutter for London's bicycle hire system, implementing API integrations for enhanced navigation.

KCL Student Services Chatbot

An interactive chatbot built using Python and the ChatterBot library to help King's College London students get answers to common service-related queries. Frontend uses HTML and CSS.

QUALIFICATIONS

JPMorgan Chase

Software Engineering Virtual Experience

April 2021

Focused on financial data visualization using Python, React, TypeScript, and JavaScript.

Goldman Sachs

Engineering Virtual Experience

August 2021

Developed insights on password security and hashing algorithms.

TECHNICAL SKILLS

Languages: Java, JavaScript, Python

Technologies: React, Node.js, Git, Spring, Maven, Docker, Flutter

Tools: Jira, Bitbucket, Git, SonarCloud

ADDITIONAL INFORMATION

Languages Spoken: English, Arabic
